Description of Problem or Suggestion:

CSMS Systems Management Subsystem Design Spec Table A-1, Requirements Trace, pp. A-37 - A-41 lists forty one (41) level 4 requirements relating to the MSS Accountability Service. All of these requirements are referenced to section 6.9 of the document. Section 6.9 of the design spec is devoid of content, consisting of two paragraphs (at 146 words, that's less than 4 words per requirement) that contain an "arm-wave" proclaiming that there will be a data base. There is NO design! That's Bad!

Originator's Recommendation

Provide the required design!! Provide scenarios that show how it works!! Show how the requireements will be met!!
